

## Graphs:

Current Monitoring: Current is recorded from the Labview software with the help of the dedicated software written and the corresponding plots were drawn.

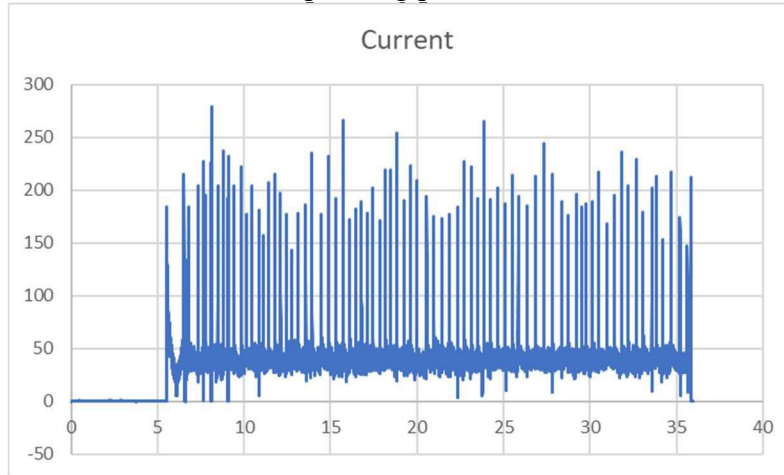

Fig. Current versus Time graph

This is the graph of one such deposition with input voltage of 22V and feed rate of 3m/min .

Voltage Monitoring: Voltage is recorded from the Labview software with the help of the dedicated software written and the corresponding plots were drawn.

- Some fluctuations are observed in the voltage graph even though it is the input parameter due to many factors such as short-circuit and working conditions.

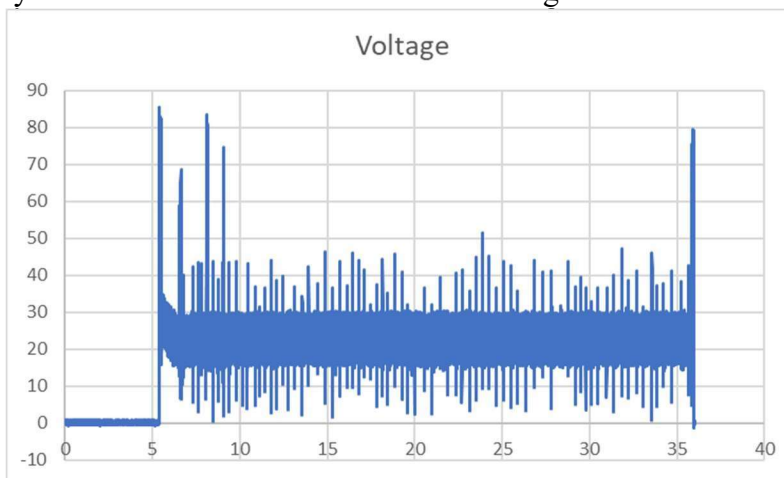

Fig . Voltage versus Time graph
